

# DIGITEACH

## DIGITEACH launched its online survey

There is growing worldwide concern about the extent of the learning loss of children forced to study at home due to the Coronavirus pandemic.

To study the impact of COVID19 on digital education in the participating countries (Bulgaria, Cyprus, Greece, Hungary, Italy, Malta, Portugal and Spain, DIGITEACH has launched an online survey to explore the innovations that have helped / will help the work of teachers in digital education and will continue to contribute to effective teaching and methodological renewal of teaching. The survey also aims to explore opportunities that help disadvantaged learners to engage in digital education and learn effectively in this form.

We need teachers of any subject and of any educational level to complete our survey.

Survey is available in project's partners languages and English at this link

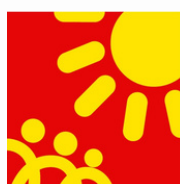

**<https://stem.uni-obuda.hu/digiteach-survey/>**

Respondents can click on the flag or country name corresponding to their nationality and fill in the survey. Survey will be closed on May 31st, 2022.

With the collected results, project partners are going to create an educational material supporting mentor training, with which those who join the mentor network gain basic pedagogical, psychological and methodological knowledge.
